

ARI Clinical Fellowship Program

The ARI Clinical Fellowship Program ^[1] allows MD-trained fellows in infectious diseases or HIV/AIDS to spend time training in Ward 86 at San Francisco General Hospital (SFGH). As home to the nation's leading AIDS program, UCSF offers a unique opportunity for trainees to gain experience working with clinicians and researchers who have been involved in the epidemic since the beginning. The ARI provides fiscal backing to the fellowship as part of its mission to nurture the next generation of leaders. Many of UCSF's extraordinary faculty have benefited from this well-established training experience, which deepens fellows' clinical knowledge and skills in HIV medicine and helps them to grow into future leaders in the field.

ARI Clinical Fellows, 2019-2020

Ayesha Appa, MD ^[2]

Andrew Kerkhoff, MD, PhD ^[3]

Michael Peluso, MD ^[4]

Sarah Puryear, MD ^[5]

Matthew A. Spinelli, MD, MAS ^[6]

ARI Clinical Fellows, 2018-2019

Jessica Briggs, MD

Jehan Budak, MD

Angelo (Asa) Clemenzi-Allen, MD

Michael Peluso, MD

Sarah Puryear, MD

Matthew A. Spinelli, MD, MAS

ARI Clinical Fellows, 2017-2018

Jessica Briggs, MD

Lillian Brown, MD, PhD

Angelo (Asa) Clemenzi-Allen, MD

Michael Reid, MBChB

Matthew A. Spinelli, MD, MAS
